

What are the professions with more job offers in Aveiro? What are the competences more demanded in the market?
 The **Competence Dashboard** developed by the **Labour Observatory** is monitoring the demand for talent and competencies from online job adds.

Results 1st Quarter 2022.

Occupations

For the job offers analyzed for Aveiro from January till March 2022, 28% referred to “software development”.

28%

SOFTWARE DEVELOPER

OCCUPATION WITH MOST DEMAND!

According to ESCO – the European multilingual classification of Skills, Competences and Occupations - the “software developers” implement or program all kinds of software systems based on specifications and designs by using programming languages, tools, and platforms.

Competencies

For each of the occupations identified in the online job offers, there is a correspondence with the competencies and skills that are required to perform each job, building on the ESCO classification. This allows for identifying the competencies with most demand in the territory.

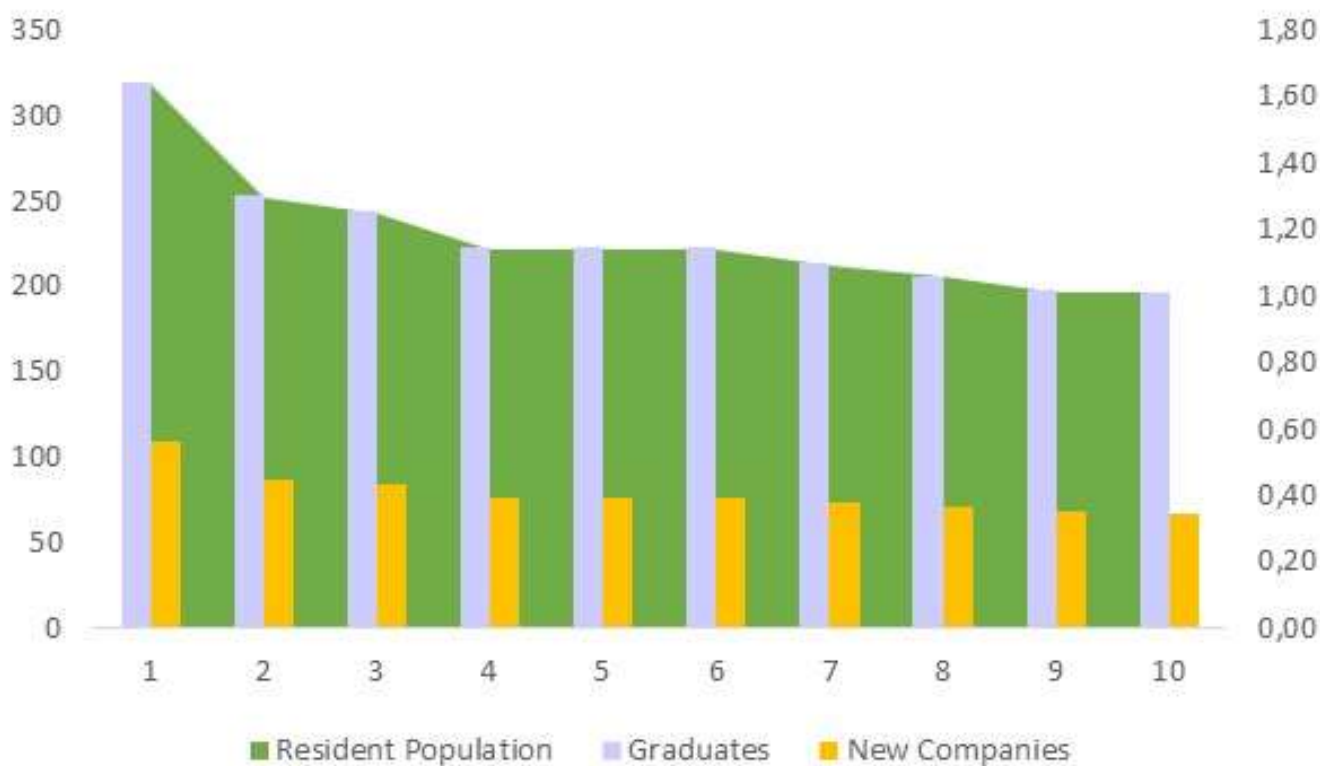

- 1 analysing and evaluating information and data
- 2 maintaining operational records
- 3 complying with health and safety procedures
- 4 directing operational activities
- 5 management and administration
- 6 mechanics and metal trades

319.4

Offers per 1000 graduates in Aveiro referred to the competency “analyzing and evaluating information and data”.

- 7 developing operational policies and procedures
- 8 complying with legal and organisational guidelines
- 9 managing and analysing digital data
- 10 interpreting technical documentation and diagrams
